Hello, I'm Paulina

I'm a hard-working programmer focus on Python language. Now on my Github you can find 6 personal projects in progress - 4 web app and 2 Tkinter app.

To deploy my web app I use an AWS cloud. I use free APIs and webscraping (Selenium /Beatful Soup) to get information. To work with data I use Pandas and to store information PostgreSQL/ SQLite databases.

I keen on to learning new tech stack - now I develop my skills in Django.

SKILLS

- Python
- Flask/Django
- PostgreSQL / SQLite
- HTML/CSS/Bootstrap
- Amazon AWS
- Pandas
- API / Webscraping
- REST API/ Postman
- Tkinter
- Git / Github
- Photoshop / Figma / Canva

LANGUAGES

- English - B2
- Germany - B2 Certificate
The Global Language System
Certificate nr 00323761
01.2020
- Polish - native

PROJECTS

DIESEL_API | https://github.com/RockPirytk/Diesel_API

Python / Flask / APIs / PostgreSQL / SQLAlchemy/ WTForms/ Bootstrap/ CSS/ HTML

This web application provides a wide range of information about diesel and costs associated with it. User can follow current information from stock trading (API). Moreover User can calculate travel cost, when he uses diesel car. User completes form and gets information about travel cost between 2 cities in Poland. To calculation user can choose from database or add his car. User can also compare his car with the lowest fuel consumption diesel car.

PREGNANT_PILLS | https://github.com/RockPirytk/Pregnant_pills

Python / Flask / SQLite/ SQLAlchemy/ WTForms/ Bootstrap/ CSS/ HTML

This app is for pregnant women to keep information about pills, which they took during pregnancy. On home page user can register a new account or continue as guest. When user is logged in, it is possible to create a list with pills. User can add a new pill or choose from database. Pregnancy week is also required. After that user gets a list with pills (with dates and type of pills), which is available to download this list as PDF file.

ARCH_INFO | https://github.com/RockPirytk/Arch_info

Python / Flask / APIs / SQLite / SQLAlchemy / SMTP/ WTForms/ Bootstrap/ CSS/ HTML

An application designed for architects. Users can choose post and read more information. Moreover users can contact with me sending an email (use SMTP). In future I want to add 2 practical section - information to create building available for disabled people and section to calculate fire protection for building segments.

EXPERIENCE

2020 - now Architect | 7r s.a.

2019 - 2020 Interior Architect | Kler s.a.

2016 - 2019 Interior Designer | Sunreef Yachts s.a.

EDUCATION

2023 - now **Engineer's degree, Informatic**
University WSB Merito

2014-2015 **Master's degree, Architecture**
Gdansk University of Technology

2010-2014 **Engineer's Degree, Architecture**
Gdansk University of Technology
